

WAND Taxonomy Library Portal Overview

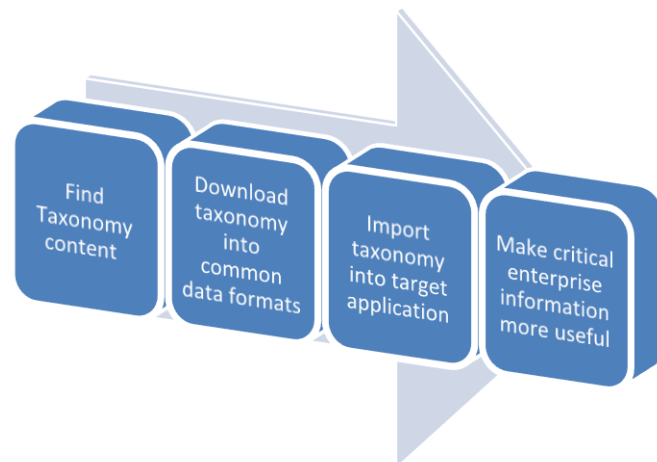

How it works

The WAND Taxonomy Library Portal contains thousands of taxonomy terms covering nearly every industry vertical and business functional area with new content added on a regular basis. Complete taxonomies or individual branches of taxonomies that are relevant to the customer can be downloaded into a wide variety of data formats to allow for easy import into the target application where the taxonomy will be used.

The WAND Taxonomy Library Portal gives clients access to thousands of professionally built taxonomy concepts for use as building blocks for a custom taxonomy model to improve information management applications.

A complete list of taxonomy topics is available at <http://www.wandinc.com/taxonomies.aspx>

With the WAND Taxonomy Library Portal, it takes just minutes for customers to identify and import professionally built taxonomy content into an information management application.

Why you need taxonomy

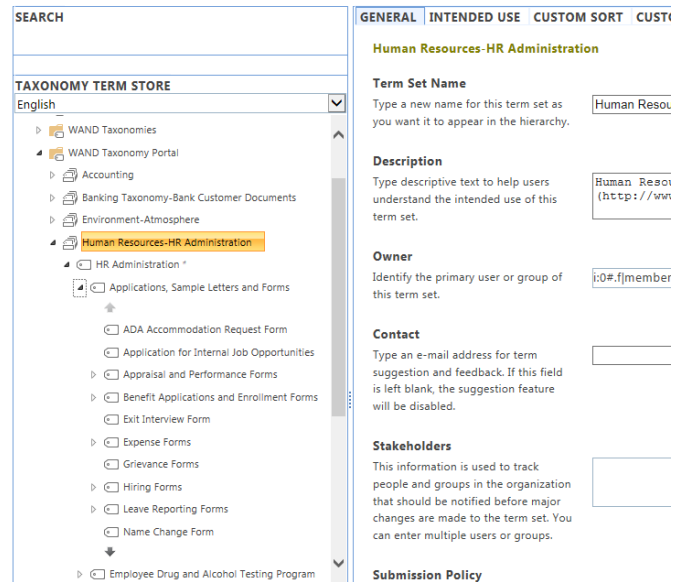

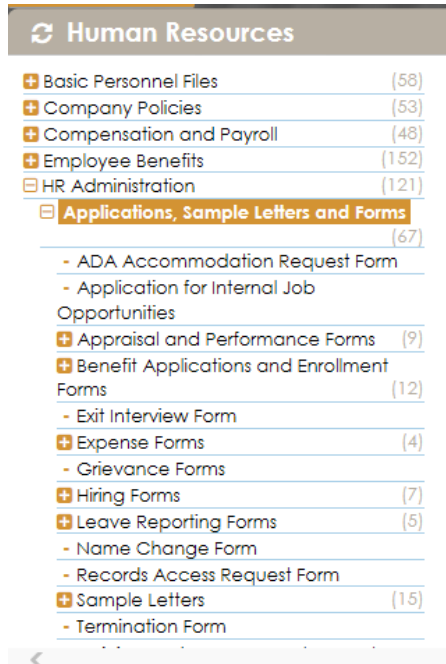

Taxonomy gives an organization a basis for structuring information consistently so it is more findable and usable. This results in improved operational efficiency and greater utilization of information assets.

Taxonomy can be used by more than 100 common information management applications to organize information more effectively. Applications include:

- Enterprise Content Management,
- Web Content Management
- Enterprise Search
- Collaboration
- Text Analytics
- Big Data
- Databases
- Product Information Management
- Master Data Management
- Digital Asset Management
- Spend Management

WAND Taxonomy Library Portal

How to get started

Customers may purchase access to the WAND Taxonomy Library Portal for use in either a single named application or for enterprise wide for use in any applications.

With access to the WAND Taxonomy Library Portal, clients get unlimited access to the complete WAND Taxonomy Library, including any new taxonomies and any taxonomy updates WAND creates.

The initial access term is one year. At the end of the year, clients may continue to use the taxonomies they have already downloaded in perpetuity at no additional cost.
