

WAND Environmental Taxonomy

The environment encompasses and sustains all living and non-living things which occur naturally on the earth. Being environmentally mindful within business is therefore quite overwhelming. But there is no need to shy away from these processes and documentation. With WAND's Environmental Taxonomy help you organize your information with ease, train your AI with speed, and begin using your documents and data in no time. With the organization piece taken care of, you can focus your efforts on the environment. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry.

This taxonomy contains **3,814** terms and **2,553** synonyms.

Top level terms include:

- Business Terminology **(68)**
- Climate Change **(90)**
