

WAND Insurance Taxonomy

The very first instances of insurance can be traced back to Babylonian and Chinese traders. Since then, insurance policies and companies have become more advanced and cover a large variety of topics. WAND's Insurance Taxonomy is a hierarchical set of terms and accompanying synonyms which cover all insurance products and underwriting procedures. The WAND Insurance Taxonomy is well suited for any insurance company. As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms relating to your specific needs or industry. The WAND Insurance Taxonomy can be combined with the WAND Health Insurance Taxonomy, the WAND Property and Casualty Insurance Taxonomy, and/or the WAND Life Insurance Taxonomy.

This taxonomy contains **1,850** terms and **444** synonyms.

Top level terms include:

- Common Policy Provisions **(94)**
- Insurance Business Terminology **(186)**
- Insurance Industry Investment Terminology **(488)**
- Insurance Regulation Terminology **(96)**
- Risk Management Terminology **(62)**
- Types of Insurance **(918)**
