WAND United States Armed Forces Taxonomy

The United States Armed Forces are the country's defense against direct threats, and they help maintain peace and stability globally. The Army, Navy, Air Force, Coast Guard, Space Force, Marine Corps, Department of Defense, and Department of Homeland Security are all important branches that provide us with the safety and freedom we all love. But each of these branches have millions of documents and data relating. To leadership, divisions, training and education, equipment, and more.

Just as the armed forces have specified structures for their people, so should they also have specified structures for their documents and data. The WAND United States Armed Forces Taxonomy provides that structure. You can organize your documents with ease, train your AI with speed, and begin using your organization's documents and data more efficiently in no time! As with all our taxonomies, this strong foundation metadata model can be customized to include additional terms related to your specific needs or industry.

This taxonomy contains **8,142** terms and **11,594** synonyms.

Top level terms include:

- U.S. Air Force **(2220)**
